🌐 <https://www.linkedin.com/in/laura-agustina-rossi/> 📍 Dublin, Ireland

SUMMARY

Senior software developer and fully qualified actuary with over 5 years of experience in financial software across the insurance and aviation finance industries, specializing in Python, SQL and Machine Learning. Adept at collaborating within cross-functional teams and managing junior team members to deliver impactful results in fast-paced environments. Strong skills in programming, problem-solving, and adapting to evolving project requirements. Reliable team player known for driving success through effective communication and technical expertise.

EXPERIENCE

Senior Software Developer

AerPrice 📅 08/2025 - Present 📍 Dublin, Ireland

Aircraft Leasing Software Provider

- Mentored junior developers, providing guidance on best practices and coding techniques for improved productivity.
- Delivered high-quality code on time by managing project timelines and prioritizing tasks accordingly.
- Trained colleagues on company standards for design and review.
- Conducted comprehensive code reviews, ensuring adherence to established coding standards and improving overall code quality.
- Contributed to the architecture design of complex software systems, ensuring scalability and maintainability.
- Designed customized solutions for proposals to potential customers.
- Analyzed work to generate logic for new systems, procedures and tests.

Assistant Manager

Deloitte 📅 09/2024 - 08/2025 📍 Dublin, Ireland

Consultancy - Actuarial Modelling Centre

- Designed updates to existing modelling processes to meet changing customer demands and adapt to new technologies.
- Implemented processes handling large amounts of data for insurance and reinsurance clients, including cleaning, validation and ETL steps.
- Communicated requirements and methodologies between actuarial and IT/software development teams, ensuring that nothing is lost in translation.
- Produced robust, accurate and documented code that minimized production issues, with results reconcilable to prior systems within 1%.
- Established development best practices, including management of software versioning and quality using Git, Jira and Azure DevOps.
- Lead technical trainings for developers and actuaries, both in-house and for clients. Mentored junior members of the team.

Consultant

Deloitte 📅 09/2021 - 09/2024 📍 Dublin, Ireland

Consultancy - Actuarial Modelling Centre

- Designed and developed actuarial modelling solutions to meet diverse needs including Personal Lines Pricing, Reinsurance Liability Modelling, Data System Optimisation, Assumptions Management, and General Insurance Reserving.
- Assessed adequacy and developed updates for pricing and reserving actuarial models for both personal and commercial policies, proposing and implementing changes as needed, in conversation with key stakeholders.
- Led knowledge transfer sessions on programming best practices, actuarial modelling, and data ethics.
- Conducted key replication and data analysis work for actuarial audits of non-life insurance and reinsurance clients.
